Microsoft Math Solver - Math Problem Solver & Calculator

Advanced Problems in Core Mathematics: 1st draft 95 Solution to question 39 The three identities just require use of the half-angle formulae $\cos^2 \theta = \frac{1 + \cos(2\theta)}{2}$, $\sin^2 \theta = \frac{1 - \cos(2\theta)}{2}$ and $\sin 2\theta = 2\sin \theta \cos \theta$. Remember, for the last one, that $\cot x = \tan(\frac{\pi}{2} - x)$. For the 1st change of variable, we have $dt = 2 \sec$.
