essential for sports performance, importantly fats, protein and carbohydrates which maintain the body's energy.

Carbohydrates are the primary fuel used by working muscles, so adequate intake is essential for preventing muscle fatigue.

## Sports Nutrition - Nutritionist Resource

Most active children can meet their nutrient needs within 1,200 to 1,500 calories through a variety of wholesome foods. Hence, they do have space for some “junk” — in moderation. Ten percent of an active child's diet can be “fun food.” Your children may actually have trouble getting adequate calories if you strictly limit treats.
