Cervical Spinal Stenosis -
What You Need to Know
Cervical spinal stenosis,
also called cervical
stenosis, occurs when the
neck's protective spinal
canal narrows due to
degenerative changes or
trauma. If the space within
the spinal canal is reduced
too much, neurologic
deficits can result from
spinal cord compression, a
condition called myelopathy.

pain that goes into the arm.

Where To Download Stenosis Of The Cervical Spine Causes Diagnosis And Treatment

The specific symptoms can vary depending on which spinal nerve root is being compressed as well as the severity of the stenosis.

Cervical Foraminal Stenosis Symptoms - Spine-health
Cervical stenosis develops when either the spinal canal or nerve passageways (foramen) become narrow. It is a common cause of neck pain. If the spinal canal is narrowed, the disorder is also termed cervical central stenosis. If the foramen, or the lateral (side) corners of the spinal canal, is narrowed, it is called cervical foraminal stenosis.

Explaining Spinal Disorders: Cervical Stenosis And Treatment

Cervical stenosis is a condition caused by the natural aging of the spine. As we get older our discs become thinner and sometimes the edges of our vertebrae become rough. This wear and tear in the neck can lead to a narrowing in the canals that the spinal cord or the smaller nerve branches (or nerve roots) pass through.

Spine in the neck. Stenosis of the spine at the back of your chest (thoracic spine) is much less common. Spinal stenosis symptoms Spinal stenosis can cause back pain and leg pain.

Spinal Stenosis - NHS TIMS

Spinal stenosis is a narrowing of the spinal canal. It occurs when the bony openings within the spine (foramina) begin to narrow, placing pressure on the nerves traveling throughout the spine. This reduced nerve space can occur within the spinal cord or where the spinal nerves exit the spinal canal.

Spinal stenosis - Symptoms and causes - Mayo Clinic
Cervical spinal stenosis is a bone disease involving the narrowing of the spinal canal at the level of the neck. It is frequently due to chronic degeneration, but may also be congenital.

Where To Download Stenosis Of The Cervical

Treatment is frequently surgical. Cervical spinal stenosis is one of the most common forms of spinal stenosis, along with lumbar spinal stenosis (which occurs at the level of the lower back instead of in the neck).

Cervical spinal stenosis -
Wikipedia

Cervical stenosis is a condition in which the spinal canal is too small for the spinal cord and nerve roots. This can cause damage to the spinal cord, a condition called myelopathy, or pinch nerves as they exit the spinal canal (radiculopathy).
