In this example, 2 simple Java TCP/IP server and client socket applications are created. One for sending character data over a TCP/IP socket connection and another one for sending binary data -an image is used-, over a TCP/IP socket connection. Java SE 8 and the Eclipse Neon setup from the post below were used.

[Creating a Simple Java TCP/IP Server and Client Socket ...](#)

In the Socket (Java Socket programming) section you will start to write simple TCP servers or TCP clients. Also, you will learn how to create a multi-user or a multithreaded server and we are going to test each written application.

[Java Network Programming - TCP/IP Socket Programming Udemy ...](#)

This book gave me a lot of understanding how TCP/IP actually work. In a small book, author explains TCP/IP, sockets and even Java NIO. And he does it better than in specialized and verbose books, each of which is devoted to one particular subject. I strongly recommend this book, especially for learning NIO.
