Brain & Behaviour Everything  
that goes on in the mind,  
the way we see, feel,  
remember and act, is  
constrained by the way the  
brain works. In Year 1 the  
aim is to provide a  
framework for understanding  
the link between brain and  
behaviour. We will begin by  
outlining the principles of  
neuroscience and their  
importance in studying  
cognitive functions.

"When we think about brain function," Dr. Schaefer says, "we typically think about how neurons control our thoughts and behavior. But the brain also contains large amounts of non-neuronal cells, including microglia, and our study puts a fresh spotlight on these cells as partners of neurons in the regulation of neuronal activity and behavior."
