A perfect binary tree is a binary tree in which all interior nodes have two children and all leaves have the same depth or same level. An example of a perfect binary tree is the (non-incestuous) ancestry chart of a person to a given depth, as each person has exactly two biological parents (one mother and one father). Provided the ancestry chart always displays the mother and the father on the ...

Binary tree - Wikipedia

Tree. A tree is a woody plant which has three principle characteristics: (a) the potential to grow to 20 ft (6.1 m) or more in height; (b) the formation of one or more trunks arising from the ground; and (c) the ability to stand on its own without support. Trees provide many products which are important to humans, such as timber, fruits, and nuts.They are also the dominant plants in the world ...

complete tree Any tree constructed from a full tree of depth k by deleting some of the leaf nodes and the arcs leading to them. In a complete binary tree, the deleted nodes are often constrained to be the rightmost terminal (leaf) nodes. The term is also sometimes used as a synonym for full tree. Source for information on complete tree: A Dictionary of Computing dictionary.

complete tree | Encyclopedia.com

Tree, woody plant that regularly renews its growth. Most plants classified as trees have a single self-supporting trunk containing woody tissues, and in most species the trunk produces secondary limbs, called branches. There are few organisms as important as trees for maintaining Earth's ecology.
