The Process of Economic Development: Amazon.co.uk: Cypher ...

Economic development is the process by which emerging economies become advanced economies. In other words, the process by which countries with low living standards become nations with high living standards. Economic development also refers to the process by which the overall health, well-being, and academic level the general population improves. During the development, there is a population shift from agriculture to industry, and then to services.

What is economic development? Definition and examples ...

Economic development, the process whereby simple, low-income national economies are transformed into modern industrial economies. Although the term is sometimes used as a synonym for economic growth, generally it is employed to describe a change in a country's economy involving qualitative as well as quantitative improvements.
