The Race Between Education And
The book argues that technological change, education, and inequality have been involved in a kind of race. During the first eight decades of the twentieth century, the increase of educated workers was higher than the demand for them. This had the effect of boosting income for most people and lowering inequality.

The Race between Education and Technology — Claudia Goldin ...
" The Race Between Education and Technology contains many tables, a few equations and a powerfully told story about how and why the United States became the world's richest nation—namely, thanks to its schools… Beginning in the 1970s, however, the education system failed to keep pace, resulting, Ms. Goldin and Mr. Katz contend, in a sharply unequal

nation…
