Enzyme production, digestion, detoxification, even the beating of your heart are all processes that require water. Water is a solvent for minerals, vitamins, and other nutrients. Water is essential for the elimination of waste. Water is involved with everything and there ' s a good reason " drink more water " is advice that ' s frequently dispensed.

Life and the Secrets of Water | Wake Up World

Water — a living substance, the most common and least understood. It defies the basic laws of physics, yet holds the keys to life. Known to ancients as a transmitter to and from the higher realms, water retains memory and conveys information to DNA. However, water can die if treated poorly. Influences such as sound, thoughts, intention, and prayer, as well as toxins such as chlorine, structure water ' s molecular arrangement — affecting all it comes in contact with.
