Momentum trading means 'going long' securities that have outperformed in the recent past. "Value profits should mirror momentum profits, and vary over time...From 1926 to 2018, following negative market return, the average so-called value premium is about three time its unconditional counterpart, whereas it appears to vanish following positive market return... Risk-adjusted value strategies are not profitable following periods of market gains."

**The Value and Momentum Trader: Dynamic Stock Selection**→

A momentum trader is a securities trader who takes advantage of market momentum for profits. There are two distinct types of momentum trading, operating in different ways. One hinges on exploiting volatility in response to breaking news, while the other involves engaging in technical analysis to identify over- and undervalued stocks.

**What is a Momentum Trader? (with picture)**

The top decile of Value and Momentum outperformed the index over the past 50 years. There is a rather low correlation of 0.5301 between Value and Momentum. Momentum has stronger returns than value, but much higher volatility and drawdowns. On a risk-adjusted basis they are similar. The Test: Blended Value and Momentum vs. Pure Value and Momentum
