~~Winner's Curse Definition~~

The winner's curse is a phenomenon that may occur in common value auctions, where all bidders have the same value for an item but receive different private signals about this value and wherein the winner is the bidder with the most optimistic evaluation of the asset and therefore will tend to overestimate and overpay. Accordingly, the winner will be "cursed" in one of two ways: either the winning bid will exceed the value of the auctioned asset making the winner worse off in absolute terms, or t

Stanford University economists Paul Milgrom and Robert Wilson suggest the winner's curse occurs when a bidder believes they paid a higher value for an asset — anything from property to gold — than its actual worth. And essentially, overcoming the curse boils down to the information available to a bidder and how they use it.
