The drain pan below your interior AC unit collects condensation. An electric pump is supposed to move this condensation to a nearby drainage pipe. The pump might have come unplugged or there may be kinks or blocks in the drainage line. Contact your local Trane Comfort Specialist if you need help.

~~Air Conditioner Troubleshooting - Trane~~

Find the air filter. Usually, it's in the furnace, air conditioner or return duct. Turn off the power to your air conditioner before you attempt to remove the filter. Take out the filter gently. If it's reusable, you can clean it, and if it's not, you should buy a new one. Replace the filter.
