Animals are heterotrophs and depend on plants and other animals for their food. Food Storage: Plants store food in the form of starch. They do not have any digestive system. Animals have a well-developed digestive system and can store their food in the form of glycogen. Respiration: The respiration in plants takes place through the stomata.

Life processes - Types Of Life processes in Plants and Animals

In this unit children will have opportunities to use: words and phrases relating to life processes eg produce new plants, produce young,
