Usability Engineering | Guide books

Ever since Jakob Nielsen (1989) suggested that five users are enough for "discount usability engineering," there has been debate over how many users are needed. Early work focused on how many people needed to discover a problem. This issue is important in government systems for several reasons:

Usability Engineering - an overview | ScienceDirect Topics

All of these approaches to system design omit the most important part of the process - the end user. In Usability Engineering, Jakob Nielsen mentions five concepts to remember when it comes to usability: Learnability: How easy the system is to use. Efficiency: How well the systems' interface maps to what someone is trying to do.
