### Amazon.co.uk: wood

Wood is a plant crop that must be harvested just like any other, but the difference is how long trees take to grow, often many years or even decades. How wood is harvested depends on whether trees are growing in plantations (where there are hundreds or thousands of the same species, generally of similar age) or in mature forests (where there's a mixture of different species and trees of widely ...

Balsa wood grows very quickly but has a relatively short lifespan, with most trees only producing usable lumber before it is 10 years old. The wood is very buoyant, and many people are surprised to learn that balsa wood is often used in building rafts, life preservers, and other types of items that are designed to float. Surfboards are a great ...
